Custom Motorcycle Spinning W

Be sure and check out our line of custom motorcycle spinning wheels. Introducing our first spinner in 2004, we were one of the first to offer custom wheels for motorcycles and we have continued to lead the industry ever since. In 2005 we introduced the Vega and Gladiator as part of our spinner line and both have quickly become huge successes! Each spinner is made of quality T6 aluminum available and come in chromed or polished. Four designs are available with a dual spinner option for that truly one-of-a-kind custom look. All wheels are available in the most popular sizes for Harley Davidson, customs, and sport bikes. Check out the links below or call 1-888-721-6495 for details on how you can get your set of RC Components Custom Motorcycle Spinning Wheels today!

Visit our online [wheel gallery](#) to see examples of what other people have done with our spinners.
